B11
15. (Amended) An optomechanical system comprising:

a sphere adapted for mounting an optical element in the sphere, the sphere having an opening shaped to receive an alignment tool; [and]

a housing adapted to receive the sphere; and

a plurality of magnets fixed to the housing and in contact with the sphere, the magnets so constructed and arranged such that the sphere has freedom for prescribed movement when required, but is otherwise stationary.

16
17. (Amended) The system of claim [16]15, further comprising a cover attached to the housing.
